# Allowable ICD-9-CM codes for speech and language pathology spell of illness approval (organized by statements)

Speech and language pathology (SLP) providers should use the following chart to determine the allowable combinations of *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) codes and statements for spell of illness (SOI) approval. Only one of statements “A” through “F” from the Prior Authorization/Spell of Illness Attachment (PA/SOIA) must be true for SOI approval. The combination of the true statement and the primary ICD-9-CM diagnosis code or the ICD-9-CM surgical procedure code is then used by Wisconsin Medicaid to assign the maximum allowable treatment days for the SOI. Statement “G” must also be true for SOI approval, but it is not used to determine the maximum allowable treatment days.

The statements below are from Element 11 of the PA/SOIA:

- A. The recipient experienced the onset of a new neuromuscular disease, injury, or condition six weeks ago or less.
- B. The recipient experienced the onset of a new musculoskeletal disease, injury, or condition six weeks ago or less.
- C. The recipient experienced the onset of a new problem or complication associated with physiologic disease, injury, or condition six weeks ago or less.
- D. The recipient experienced the onset of a new psychological disease, injury, or condition six weeks ago or less.
- E. The recipient experienced an exacerbation of a pre-existing condition six weeks ago or less.
- F. The recipient experienced a regression of his or her condition due to lack of therapy six weeks ago or less.

**AND**

- G. There is a reasonable expectation that the recipient will return to his or her previous level of function by the end of this SOI or sooner.

**Note:** Statements “C,” “D,” and “F” do not apply to SLP services.

Each chart is specific to one of the above statements. The statement and the maximum allowable treatment days are provided at the top of each chart.

To use these charts:

1. Find the chart that corresponds to the true statement (Element 11 of the PA/SOIA).
2. Find the appropriate ICD-9-CM code and description. The diagnosis codes are listed before the surgical procedure codes. The code descriptions are organized alphabetically within these categories (Element 10 of the PA/SOIA).
3. If the ICD-9-CM code is listed in the chart, refer to the statement at the top of the chart for the maximum allowable treatment days for the corresponding combination of the ICD-9-CM code and statement.
4. If the ICD-9-CM code is not listed in the chart, the combination of the code and statement does not allow for SOI approval. The ICD-9-CM code may be listed under another statement.

Some ICD-9-CM codes have more than one allowable statement for SOI approval. Speech and language pathology providers should determine which statement best describes the recipient’s condition.

Only the ICD-9-CM codes listed in the following charts are available for SOI approval. If the ICD-9-CM code for the SLP service is not listed, the provider should submit the Prior Authorization Request Form (PA/RF) and the Prior Authorization/Therapy Attachment (PA/TA).
